

# Adobe Photoshop – startup

## courseoutline

---

### Course Introduction & Aims:

Photoshop is the industry standard for image manipulation and one of the few applications to consider for the manipulation and creation of images and artwork on the computer.

This training course is aimed at virgins of Photoshop and will set you on your way to pixel heaven. Learn about the interface of this vast application. Understand how to set its preferences. Explore the basics of Layers, Colour Correction, Image Enhancement and more.

Stop simply staring at the screen when you launch Photoshop and start to get to grips with its potential.

We can deliver training over one or two days and in some circumstances will even recommend half-day workshops to allow you to maximise your learning potential.

### Course Content:

#### Scanning & Acquiring Images
